Childhood Vaccination Coverage Statistics
England, 2016-17
Published 20th September 2017

Most of the immunisation statistics relate to routine childhood vaccinations which are offered to all children at specified ages. For all vaccinations, the number of persons vaccinated as a proportion of the eligible population (coverage) is reported.

National coverage

Four out of the six routine vaccinations at 1 and 2 years showed small decreases in coverage compared to 2015-16.

DTaP/IPV/Hib

93.4% of children reaching their 1st birthday completed primary immunisation courses against Diphtheria, Tetanus, Pertussis, Polio and Haemophilus influenzae type b (DTaP/IPV/Hib).

Measles, Mumps and Rubella

95.0% of children reaching their 5th birthday received the first dose of the vaccine (MMR1) against Measles, Mumps and Rubella.

Local coverage

Out of 149 Local Authorities:

68 met target of 95% for DTaP/IPV/Hib at 1st birthday

101 met WHO target of 95%* for MMR1 at 5th birthday

* The World Health Organisation (WHO) has set a target of 95% coverage for MMR vaccinations.
